Languages

German, English, Spanish

EDUCATION

Full-Stack Web Development

CareerFoundry | Remote
April - December 2024
Intensive project-based
training in developing
three-tier apps

Master of Arts

International Relations

University of
Eichstätt-Ingolstadt
October 2014 - April 2017

SUMMARY

Former dance school manager and teacher turned full-stack developer. Developed Google Apps Scripts to optimize IT Workflows, streamlining operations. Passionate about building solid web solutions. Self-taught developer with a background in aerospace engineering, who completed a coding Bootcamp to get a more structured education. Experienced with full-stack projects, including cloud deployments.

WEB DEVELOPMENT PROJECTS

Cloud Computing | Oct - Dec 2024

Technologies: AWS EC2, Load Balancer, S3

- Architected and deployed a scalable, high-availability three-tier application in an AWS VPC.
- Enabled dynamic scaling with Application Load Balancers and automated instance provisioning.
- Optimized static asset delivery using S3.

Front-End Development | Sep 2024

Technologies: Next.js, Tailwind CSS

- Designed a responsive portfolio website to showcase skills and projects.
- Achieved performance optimization and cross-device/browser responsiveness.

Full-Stack Development | May - Jun 2024

Technologies: React, Node.js, Express, MongoDB, Bootstrap

- Built a user-friendly movie app with a RESTful API back-end
- Delivered a responsive UI and seamless user authentication.
- Integrated MongoDB Atlas for efficient data storage and retrieval.

WORK EXPERIENCE

Studio Manager and Executive | May 2017 - Nov 2023

Hep Cat Club GmbH, Augsburg

- **Optimized IT workflows** by developing custom Google Apps Script macros, seamlessly integrating Google Calendar, Google Sheets, Google Forms and WordPress to improve automation and efficiency.
- **Managed a diverse product portfolio** with 20+ teachers and 200+ regular attendees, while organizing five annual events with 200+ participants each.
- **Launched an innovative online platform** for video services and virtual classes, retaining customers and bypassing traditional revenue streams during shutdowns.
- **Preserved the paying customer base** through a volunteer-driven communication campaign to engage customers, fostering loyalty despite the absence of in-person services, enabling a strong post-restriction recovery.
- **Established the studio as a leading West Coast Swing school in Germany**, thorough a comprehensive curriculum, transforming a niche dance into a broader, more appealing offering for diverse audiences.

WORK EXPERIENCE

Studio Manager and Executive | May 2017 - Nov 2023

Hep Cat Club GmbH, Augsburg

- **Optimized IT workflows** by developing custom Google Apps Script macros, seamlessly integrating Google Calendar, Google Sheets, Google Forms and WordPress to improve automation and efficiency.
- **Managed a diverse product portfolio** with 20+ teachers and 200+ regular attendees, while organizing five annual events with 200+ participants each.
- **Launched an innovative online platform** for video services and virtual classes, retaining customers and bypassing traditional revenue streams during shutdowns.
- **Preserved the paying customer base** through a volunteer-driven communication campaign to engage customers, fostering loyalty despite the absence of in-person services, enabling a strong post-restriction recovery.
- **Established the studio as a leading West Coast Swing school in Germany**, thorough a comprehensive curriculum, transforming a niche dance into a broader, more appealing offering for diverse audiences.

Full-Stack Web Developer with comprehensive expertise in creating and maintaining web applications, and a passion for test-driven development. Experienced in both collaborative environments and detail-oriented, independent work, consistently ensuring reliable and timely delivery.

- **Developed a comprehensive West Coast Swing curriculum**, transforming a niche dance into a broader, more appealing offering for diverse audiences. **Established the studio as a leading West Coast Swing school in Germany**, driving customer interest and expanding market share in a competitive industry.

Full-Stack Web Developer with comprehensive expertise in creating and maintaining web applications, and a passion for test-driven development. Successfully launched innovative platforms and digital content strategies, including an online video and virtual class service that retained customers and generated revenue during industry shutdowns. Skilled in collaborating within teams and working independently to meet deadlines and exceed expectations.

- **Developed and launched an innovative online platform** offering video services and virtual classes, allowing the company to retain its customer base during shutdowns and bypass traditional revenue streams.
- **Mobilized and coordinated a volunteer-driven initiative**, leading an online communication campaign that kept customers engaged, ensuring continuous membership and fostering loyalty despite the absence of in-person services.
- **Successfully preserved the paying customer base** through a strategic combination of digital content and community engagement, positioning the company for a strong recovery once restrictions were lifted.
- **Developed and launched a comprehensive, engaging West Coast Swing curriculum** at a time when the dance was a niche pursuit with a limited following, creating high-quality content and an attractive structure to make it more appealing to a broader customer base, including those who typically preferred traditional dance styles.
- **Positioned the studio as one of the leading West Coast Swing schools in Germany**, driving customer interest and expanding the studio's market share within the competitive dance industry.

Officer | Jul 2006 - Jun 2011

Bundeswehr, various locations in Germany

- **Action verbs that describe what I have achieved**

Served in the Bundeswehr (German Federal Defense Forces) as an Officer, responsible for military planning, personnel management, and legal training. Developed strong problem-solving skills and a strategic mindset in high-pressure situations.

Back-End Development | January 2025 - Present

Developed a Rust-based back-end system to handle user authentication and business logic for a web application

- **Technologies:** Rust, Actix, REST API, JWT authentication
- Designing and implementing efficient database queries to ensure fast and reliable data retrieval.

Challenge: The new dance West Coast Swing, a niche product, that was very young on the market be marketed.

Action: Created a curriculum that is attractive. It is engaging while creating a high quality.

Result: The studio advanced to one of the most successful dance schools in Germany, specialised in that field. The curriculum ensured to attract many customers who would usually rather choose more traditional dance schools.

Challenge Action Result (Impact)

What was my overall challenge in my role: What was I hired to do - what was my goal? What actions did I take to overcome the challenge.

Only list the task, that relates to the challenge I solved.

What was the result of my action. How did it improve the situation?

CAR does not have measurable results.

Show that you added value in that previous role.

Challenge: New studio rooms created a large deficit, which had to be overcome by a larger customer base. Shut downs would not allow any of the traditional ways for creating revenue. Danger of loosing customers which would be a deadly setback for the company. The current customer base was needed to survive after all restrictions and subventions. Mission was to keep customers in the absence of a product they actually paying for.

Action: Created an innovative online platform video service and online classes with volunteers and a communication campaign that kept customers engaged having a stake in company.

Result: Paying customers base could be saved through all shut-downs, enabling the company to have a good standing when restrictions where lifted.

Created online platform that kept customers engaged

Cloud-Computing | Oct - December 2024

Architected and deployed a cloud-based, three-tier application in an AWS VPC for a scalable and high-availability solution.

- **Technologies:** AWS EC2, Load Balancer, S3
- Managed dynamic scaling using Application Load Balancers and automated provisioning of instances.
- Integrated static assets with S3 for efficient front-end delivery.

Front-End Development | Sep 2024

Designed and developed a responsive portfolio website to showcase technical skills and projects.

- **Technologies:** Next.js, Tailwind CSS
- Ensured performance optimization and responsiveness across devices and browsers.

Full-Stack Development | May - Jun 2024

Built a three-tier movie application with a user-friendly front-end and a RESTful API back-end.

- **Technologies:** React, Node.js, Express, MongoDB, Bootstrap
- Developed a responsive, interactive user interface optimizing the user experience across devices.
- Implemented a REST API handling user authentication and business logic.
- Integrated MongoDB with Atlas to store and retrieve movie and user data efficiently.

Hi, I'm Otmar, a passionate full-stack web developer. Much of my expertise is self-taught, gained through distance university studies, leading a dance studio, and learning web development. Self-reliant and resilient, I manage the entire web development process—from planning and implementation to testing and delivery—even in adverse circumstances. With a strong passion for test-driven development and a commitment to high reliability, I consistently deliver quality projects on time, ensuring great results for my clients
